PROFESSIONAL SUMMARY

Engineering graduate with hands-on experience in Generative AI, Python, Data Analytics and AI application development. Skilled in SQL, databases, REST APIs, JSON/XML, data integration, exploratory data analysis and AI-assisted development. Built intelligent applications using Python, LangChain, LangGraph and FastAPI, with practical exposure to prompt engineering, automation, testing and debugging. Brings strong analytical problem-solving, business understanding and teamwork skills, with exposure to enterprise, ERP and cloud application concepts.

CORE TECHNICAL SKILLS

Programming	Python, SQL
AI & Application Development	Generative AI, Prompt Engineering, LangChain, LangGraph, FastAPI, NLP, AI-Assisted Coding, Automation
Data & Analytics	EDA, Data Cleaning, Data Visualization, Statistical Analysis, Data Integration, DBMS
APIs & Data Formats	REST APIs, JSON, XML
Tools / Platforms	Jupyter Notebook, ChatGPT, Microsoft Copilot, Gemini, Claude
Enterprise / Business	ERP Concepts, Business Process Concepts, Supply Chain & Logistics
Professional	Analytical Thinking, Problem Solving, Communication, Teamwork, Adaptability, Time Management, Client-focused Problem Solving

PROFESSIONAL EXPERIENCE

Agentic AI Intern | Innomatics Research Labs Pvt. Ltd., Pune | Feb 2026 – Jun 2026

• Designed and implemented autonomous multi-agent workflows using Python, LangChain, LangGraph, and FastAPI to streamline complex, multi-step business logic.
• Developed modular REST API endpoints to serve real-time LLM responses with structured JSON validation and error handling.
• Formulated few-shot and chain-of-thought prompt templates, improving answer precision, context retention, and reducing token latency.
• Executed end-to-end debugging, unit testing, and solution validation across edge cases to verify output reliability and compliance with data privacy standards.

PROJECTS

AI-Powered Virtual Assistant & Task Automation | Python, Generative AI, NLP, FastAPI, REST APIs

• Engineered an autonomous AI assistant that translates natural language prompts into automated web operations, data fetching, and API tool invocations.
• Integrated multi-LLM backends via secure endpoints, managing dynamic conversational memory and context windows.
• Structured prompt pipelines with guardrails to mitigate hallucinations and ensure deterministic JSON/XML data output.

Exploratory Data Analysis (EDA) on Sales Trends | Python, Pandas, NumPy, Matplotlib, Seaborn

• Conducted structured Exploratory Data Analysis (EDA) on multi-source transactional sales datasets to uncover seasonality, revenue drivers, and customer purchasing patterns.
• Performed comprehensive data cleaning, missing value imputation, and anomaly detection to guarantee data integrity across records.
• Generated clear visual dashboards and correlation matrices to translate raw metrics into actionable business intelligence for strategic decision-making.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics & Telecommunication | Savitribai Phule Pune University, Pune | June 2026 | CGPA: 7.65
Higher Secondary School Certificate (HSC) | Maharashtra State Board | March 2022 | Percentage: 70.33%

TARGET ROLES

Junior Data Scientist | GenAI Application Developer | Python Developer | Data Analyst | Associate Software Engineer
